Senior software developer - more in poulou.gr

WORK EXPERIENCE

KAV Autoverhuur, Amsterdam — Software developer

Dec 2017 - now

Maintaining, extending and training users and entry level developers for the current **symfony**-based CRM system. The software is used as a service for many subsidiaries of KAV as well as 3rd party external partners.

- Developed from scratch the mobile apps for **android** and **iOS** with the use of **React Native**. Integrated in-app payments with **iDeal**, **google** and **apple maps** and **camera/QRcode** scanning.
- Rewrote all the websites of the company with the help of **wordpress elementor**.
- Developed a **nodeJS/webSocket/react chromium kiosk** terminal, alongside with a simple **linux distribution**, based on **Raspberry Pi OS**, using **C++** for reading the **RFID chip** and taking scans of legal documents. The project is present around the country of the Netherlands in popular locations such as all **IKEAs**, various **Praxis** and **Hornbach** locations.

Allegria, Kavala — Developer

Oct 2013 - Nov 2015

Allegria was a Greek web agency located in Kavala. Our main occupation was to design and develop **Drupal** and **Wordpress** websites for other companies or government agencies. We were responsible for the whole **corporate identity**, the **online marketing** and sometimes the traditional printed flyers and catalogs. We have also been proud to develop small **android apps** and **mini browser games**.

Subtitle Translation

In depth expertise

Resume follow-up, Pouloutidis Dimitrios

PHP/Symfony — Highly skilled

Plenty of experience with vanilla PHP, **composer** as well as **Symfony**. From creating entire websites, maintaining SaaS backend systems to **RESTful** endpoints and everything in between.

Obsessed with best practices, guidelines and always one step away from refactoring.

nodeJS/React (Native) — Highly skilled

Keeping a very close eye and early adapting everything in the react and react native universe. From hooks in **React** to automatic linking in **React Native**, the road is hard, but certainly exciting.

SQL — Highly skilled

Designed databases for websites with **mysql**, **SQLite** for android apps but also for small **.NET** applications with **ms SQL**. High familiarity with **Doctrine** and the command line interface as well as database management systems like **phpMyAdmin**.

Heavily occupied with performance optimization for large drupal mysql databases. **Slow query optimization** with indexes using **percona toolkit**.

System administration under Linux— More than basic

Debian, **Ubuntu** and lately **Pop!_OS** user. **Dedicated server** management over **XenServer** Virtualization. On web servers running **apache2** mainly but also **nginx** in some cases and various caching and compression techniques. **Raspberry Pi** enthusiast and DIY everything.

I intimate with the **terminal** and slowly turning into a tiling window user.

Drupal, Wordpress — Highly skilled

More than two year daily contact with high requirements. From creating **Custom Themes**, to developing **Custom Modules/Plugins**. In cases with **e-shop** (Drupal Commerce, WooCommerce), music streaming, business websites, travel blogs etc.

Experienced with the command line interface of drupal (**Drush**) and **cron jobs** for under the hood tasks.

Boost highly demanding websites, with SEO, caching techniques and the reverse proxy like **CloudFlare**.

MORE COMPETENCIES

- Basic experience with **Kubernetes (K8s)** container orchestration.
- Implemented small **Facebook Apps** for gaining familiarity with permissions and Graph API.
- A plethora of experience with Adobe **Photoshop** and **Gif Animations**.
